

THE UNIVERSITY OF LOUISVILLE, LOUISVILLE, KY.

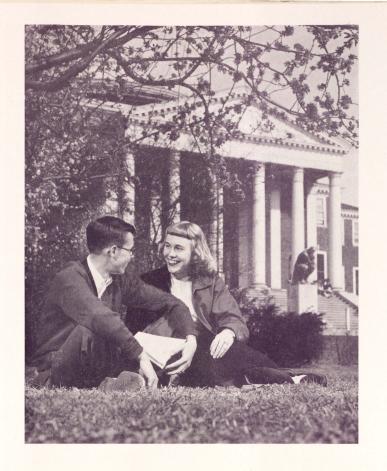

## After High School-What?

It depends on what you want when you leave high school. If you want knowledge and wisdom and understanding, if you want the rich friendship of men and women pledged to the service of teaching, if you want a better understanding and a higher appreciation of your fellow men, if you want to live in an environment dedicated to the purpose of developing human character, if you want broadened horizons, higher ideals and inspired motivation for living, then you should go to college. A college education will mean all these things to you if you have ambition and a willingness to work.

#### Why go to the University of Louisville?

In its devotion to the education of its students, this University is remarkable

- · for its well-trained faculty of inspiring teachers,
- for its emphasis upon spiritual and ethical values in life,
- · for its accreditation by the highest educational associations in the country,
- for the reputation for scholarship it has maintained in its long tradition,
- · for its well-equipped libraries, laboratories and classrooms,
- and for its wholesome student life with suitable athletic and social programs under the guidance and leadership of a competent University faculty and administration.

OVER ONE HUNDRED AND FIFTY YEARS AGO, the University of Louisville was created. Its growth in those early days is better understood when we read of the cultural and social attributes of the men and women who, at that time, were guiding the development of a small town into what has since become the great city of Louisville. The leaders of the community were eager to plan for a pleasant and prosperous city, but they were also eager to provide professional and cultural opportunities for Louisville's youth. It is only natural, then, that the names of the old families associated with Louisville's history should be closely woven into the development of the University itself. The institution grew as the city grew, until it expanded into the modern municipal university of today, encompassing several campuses and numerous buildings.

The University is composed of the College of Arts and Sciences, the Schools of Medicine, Dentistry, Law and Music, the Speed Scientific School, the Kent School of Social Work, the Graduate School, the Division of Adult Education and the Southern Police Institute. The University is approved by the Association of American Universities, and each of the schools is fully accredited by its respective regional and national agency.

GARDINER HALL, WHERE THE PHILOSOPHY OF A LIBERAL EDUCATION HAS EVER BEEN ADVANCED AS THE FOUNDATION UPON WHICH TO BUILD A LIFE OF ENDURING SATISFACTION AND USEFULNESS

## College of Arts and Sciences

The College of Arts and Sciences, the heart of the University, is situated on Belknap Campus. A direct descendant of Jefferson Seminary, chartered in 1798, the College offers curricula leading to the degrees of Bachelor of Arts and Bachelor of Science with majors in Applied Music, History of Music, Music Theory, English, Humanities, Creative Art, History of Art, French, German, Spanish, Philosophy, Botany, Zoology, Biology, Business Administration with fields of specialization in Accounting, Banking and Finance, Marketing and Industrial Management, Chemistry, Home Economics, Mathematics, Naval Science, Physical Education, Physics, Psychology, Economics, Education, History, Political Science, Secretarial Science, Sociology and Social Work. The College also offers the Associate in Arts degree which requires only two years' work.

The major purpose of the College of Arts and Sciences is to provide opportunity for study in subjects of cultural value and to develop the ability for independent thinking and expression. Because another of

its major purposes is to provide pre-professional training, it can also be said that down the walks of Belknap Campus come the doctors, dentists, lawyers, social workers and educators of tomorrow. For these students the College offers courses requisite to graduate work, to professional education in medicine, dentistry, law, pharmacy and medical technology, and to certificates in elementary and secondary teaching.

For admission to the College one must have been graduated from an accredited senior high school and have at least fifteen acceptable year units of credit. In addition, applications for admission cannot be approved until the Placement Tests of the College have been satisfactorily completed. These tests are given at regular intervals throughout the year.

AFTER CLASSES ARE OVER

SPEED SCIENTIFIC SCHOOL, WHERE STUDENTS ARE PREPARED FOR CITIZENSHIP

AS WELL AS FOR LEADERSHIP IN THE SCIENCE OF ENGINEERING

## Speed Scientific School

Opened in 1925, the Speed Scientific School is the Engineering College of the University of Louisville. This School is operating on a five-year plan because, after thorough study of industrial and professional needs, it was believed this extension and strengthening of the School's offerings would be valuable not only to the engineering student, but to the profession of engineering. The Speed Scientific School offers five-year curricula on the cooperative system in chemical, civil, electrical and mechanical engineering leading to the degree of Bachelor of Engineering in these respective fields. Under the cooperative system the student receives actual experience as a regular employee in industry.

Affiliated with the Speed Scientific School is the University of Louisville Institute of Industrial Research,

This institute performs scientific and engineering research and development work for industry under contract, utilizing the facilities of the University laboratories, faculty and students. A modern research building houses the Institute, and the work of the Institute is of great value in the engineering educational program, offering fellowships to worthy graduate students and providing a field of creative endeavor for its students and faculty.

A student is eligible for admission to the Speed Scientific School upon the basis of graduation from an accredited high school with at least fifteen standard units of credit of which eleven must be academic, not vocational, in character. Of the eleven there must be three in English, two in Algebra, one in Plane Geometry, one-half in Solid Geometry, one-half in Trigonometry, and one in Physics or Chemistry. In addition to these specific requirements, each applicant for admission must meet the standards established by placement tests given by the Speed Scientific School prior to the beginning of each term.

APPLIED THEORY

GARDENCOURT, HOME OF THE SCHOOL OF MUSIC, WHERE EXPERIENCE AND TRAINING OF SKILLFUL TEACHERS IS REFLECTED BY THE MANY FINE CAREERS OF ITS GRADUATES

#### School of Music

The School of Music of the University of Louisville, founded in 1932, is situated on the handsome estate, Gardencourt. It is one of the most beautifully housed schools in this country. Two buildings are set in fourteen acres of formal lawns and gardens and natural woods on the edge of Cherokee Park. There is hourly bus service between Belknap Campus and the School of Music.

Preparatory and non-credit departments are maintained. Students of any age and of any advancement may enroll in these departments at any time. All Applied Music subjects are open to preparatory and non-credit students.

The collegiate department offers two degrees, Bachelor of Music and Bachelor of Music Education. The major subjects in the Bachelor of Music course may be piano, voice, organ, orchestral instrument, history of music, theory, composition, piano pedagogy or voice pedagogy. In the course that leads to the degree

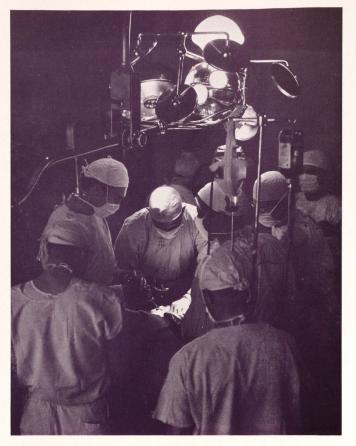

of Bachelor of Music Education students may elect to pursue a major in either the instrumental or choral division.

The Contemporary Music Festival, held at the School of Music each May, and recitals by faculty and students are stimulating events. The Louisville Orchestra has become nationally known, due to its program of commissioned works which receive their world premieres here. More than one-half of the orchestra's personnel is, or has been, associated with the School of Music as students or instructors.

Graduates of accredited high schools, offering fifteen units of acceptable entrance credits, may be admitted on certificate as candidates for degrees. Of the fifteen units, twelve at least must be academic, not vocational, in character, and of the twelve, three must be in English, one in Mathematics, two in Foreign Language, and one in Science or History. In addition, candidates for degrees must present satisfactory evidence of prerequisite training in Applied Music subjects.

AN ASSIGNMENT IN LISTENING PLEASURE

TODAY'S TRAINING AT THE SCHOOL
OF MEDICINE REAFFIRMS THE IDEALS
AND TRADITIONS THAT HAVE GROWN
WITH THE YEARS

#### School of Medicine

The School of Medicine is descended from the Louisville Medical Institute, which was chartered by the Kentucky Legislature in 1833. It is the only Medical School in the State of Kentucky. In 1910 the School of Medicine was granted Class A standing by the Council on Medical Education and Hospitals of the American Medical Association and by the Association of American Medical Colleges, and it has continuously maintained this standing since then. The degree of Doctor of Medicine conferred by the University of Louisville is recognized by every State Board in the United States for both licensure examinations and reciprocity, and also for licensure examination by the National Examining Board and by the British Conjoint Board.

In 1922 the University made an agreement with the City of Louisville to assume complete year-round responsibility for the medical service of the City Hospital and this arrangement has continued to the present time. In 1946 the Medical School agreed to direct the appointment of the professional staff of Nichols General Hospital (Veterans Administration Hospital). Training facilities of the Medical School include Waverly Hills Tuberculosis Hospital, the Children's Hospital, the Mental Hygiene Clinic, Children's Center and Central State Mental Hospital.

Eleven of the graduates of the School of Medicine have been chosen as presidents of the American Medical Association. Only one of the nation's medical schools has surpassed this record.

An acceptable applicant to the School of Medicine is one who, in the opinion of the Committee on Admissions, will not only be a successful medical student but also develop into a useful and respected citizen and physician in his community. At least three full years of better than average undergraduate work taken at an approved college or university is considered adequate preparation for the study of medicine. Four years and a bachelor's degree are considered still better. These programs must, of course, contain the few specified courses. Above all, however, quality is more important than quantity, and a student with three years of excellent undergraduate work is preferred to one with four years of medium quality work.

FROM A MEDICAL LIBRARY OF 30,000 VOLUMES

THE SCHOOL OF LAW, WHERE STUDENTS ARE INSPIRED TO RESPECT THE NOBLEST QUALITIES

OF THE LEGAL PROFESSION AND ITS RESPONSIBILITIES TO MAN AND SOCIETY

#### School of Law

The School of Law was founded in 1846, and is the second oldest law school in the South. Being fully accredited by the Association of American Law Schools and The American Bar Association, its graduates are admitted to the bar examinations in any state in the Union.

The curriculum is so designed as to make legal training available to all qualified applicants. Accordingly, both day and evening classes are offered. The evening curriculum and the three-year curriculum (day classes) are available to students who have successfully completed three years of work in an accredited college. The four-year curriculum (day classes) is available to students who have successfully completed two years of work in an accredited college.

The Library is one of the most complete in the State of Kentucky and is among the best in the entire South. It is one of the twenty repositories in the United States for annual copies of the Supreme Court Records and includes, among others, the private library and papers of the late Justice Louis D. Brandeis of the United States Supreme Court.

The Student Bar Association, a Charter Member of The American Law Students Association sponsored by The American Bar Association, provides for student self-government. Examinations are given under the honor system operated by the students.

The staff of the Briefing Service, composed of selected students, provides a free service for lawyers throughout the State of Kentucky who, by reason of limited library facilities, are unable to examine all of the authorities on questions of law which come before them. Developed first in the country by the University of Louisville Law School, the briefing service is illustrative of the School's record in giving the students opportunities to familiarize themselves with modern legal problems and in fostering closer relationship between students and practicing lawyers. Another valuable part of the law program is the Practice Court which meets weekly.

COURT IN SESSION

GRADUATE STUDY RESULTS IN THE GROWTH OF GREATER COMPETENCE AND LEADERSHIP IN FUTURE YEARS

#### Graduate School

The Graduate School is the capstone of a university, without which no university is worthy of the name. It infuses into a university an atmosphere of investigation, research and growth; it vitalizes a community by providing intelligent and constructive leadership. It is in a Graduate School that the influence of great teachers will many times provide the inspiration for men and women to reach new heights in growth of character, in cultural tastes and in the development of their innate capacity for learning. The Graduate School has long recognized its responsibility. For this reason every effort is made to seek out areas for

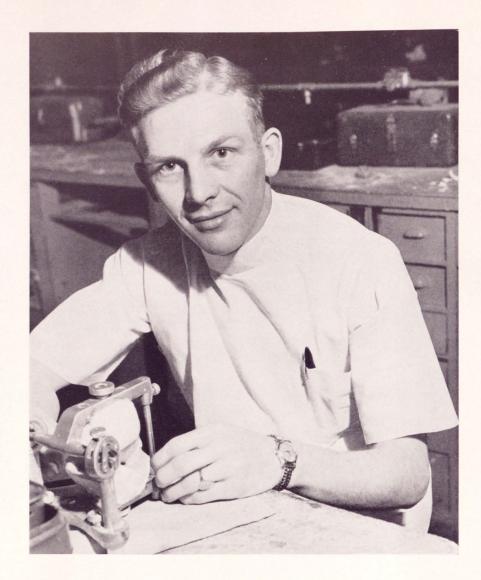

service in graduate study and to provide this service by a vigorous and effective program. Professional men and women, teachers, students of the arts and sciences are looking increasingly to the University of Louisville for leadership in graduate study.

Graduate degrees granted by the University of Louisville include the Master of Arts, Master of Business Administration, Master of Education, Master of Science, Master of Science in Medical Sciences, Master of Chemical Engineering, Master of Civil Engineering, Master of Electrical Engineering, Master of Mechanical Engineering, Master of Psychology, Master of Science in Social Work, and Doctor of Philosophy in Chemistry.

Graduate degrees require a minimum of one year of work, the time varying in accordance with the preparation of the student and the degree sought. Transfer graduate work will be accepted only from institutions which offer advanced degrees; the work offered will be evaluated by the head of the department in which the applicant is seeking further graduate work.

GOOD STUDY HABITS ARE IMPORTANT

THE DENTAL STUDENT OF TODAY BECOMES
THE PROFESSIONAL MAN OF TOMORROW,
FAMILIAR WITH THE LATEST DEVELOPMENTS,
AND TRAINED IN THE NEWEST TECHNIQUES
OF MODERN DENTAL PRACTICE

# School of Dentistry

The School of Dentistry was organized in 1886 and is accredited with full approval by the Council on Dental Education of the American Dental Association. This School has a national reputation for its community service. In the Louisville General Hospital it maintains a department for the care of hospital and out-patient dispensary cases. It provides free dental service to patients at the Kosair Crippled Children's Hospital. In cooperation with the Louisville and Jefferson County Board of Health, it provides free dental service to indigent children in the Health Centers at Beecher Terrace and Clarksdale. The clinic at the School of Dentistry, with full modern equipment and more than one hundred patient chairs, furnishes dental services to more than 5,000 individuals each year.

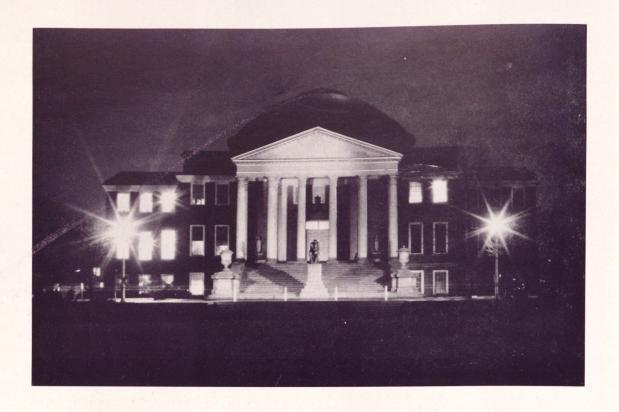

Courses are offered leading to the degree of Doctor of Dental Medicine, and the School also offers refresher courses in general clinical dentistry. Under a grant from the Federal Security Agency, U. S. Public Health Service, the School of Dentistry has established a program for teaching cancer prevention, diagnosis and treatment.

More than ninety per cent of the practicing dentists in Kentucky are graduates of the University of Louisville School of Dentistry, and more than 1,800 living graduates of this School are practicing in forty-five states and in many foreign countries.

The scholastic requirements for admission to the study of dentistry are at least two years (60 semester hours) of academic work taken in an approved and fully accredited college or university. Certain undergraduate courses are specified and admission is further based upon evidence of intellectual capacity adequate to the pursuit of the profession, and other qualifications which indicate the student is fitted for the study and practice of dentistry.

MODERN EQUIPMENT FOR EFFECTIVE INSTRUCTION

THE LIGHTS BURN ON BELKNAP CAMPUS AT NIGHT FOR THOUSANDS OF MATURE MEN AND WOMEN WHO LOOK TO THE UNIVERSITY AS A PLACE WHERE THEY WILL RECEIVE NOT ONLY VOCATIONAL DIRECTION, BUT A GREATER APPRECIATION OF THE VALUE OF EDUCATION AND ITS RELATIONSHIP TO THE ART OF GOOD LIVING

## Division of Adult Education

The Division of Adult Education provides an opportunity for further study at university level for those who are unable to attend daytime classes on Belknap Campus. The Division is founded on the belief that education is a process that does not stop with graduation or at any age level, but continues on through life. Evening and late afternoon classes are offered in almost every field, including courses from the curricula, undergraduate and graduate, of the College of Arts and Sciences, the School of Medicine and the Speed Scientific School.

Supplementing its adult education program on Belknap Campus, the Division of Adult Education conducts in-plant educational programs for industry on behalf of employee self-advancement. Its industrial Consulting Service plans and develops in-plant educational programs designed to qualify employees for specialized assignments. Adult education classes are held in hospitals for in-service training of hospital staffs and personnel. A comprehensive college program is provided for the military personnel and civilian employees at Fort Knox, Kentucky.

In cooperation with the Louisville Free Public Library, evening classes at university level are held during the academic year in branch libraries. These Neighborhood Colleges, receiving favorable national attention, are designed to bring the services of the University closer to the homes of the citizens.

The Division of Adult Education has pioneered in offering short non-credit courses for adults who want to develop new interests, answer essential needs or gain satisfaction which comes from intellectual stimulation. The Division's Department of Management Services provides Louisville business and industry

with a wide variety of courses designed for intensive specialized training. Forums, institutes and conferences related to vital management matters are planned and supervised by this Department to meet industrial demands.

It is possible for a student, by taking evening classes, to meet the requirements for the degrees of Associate in Arts, Bachelor of Arts, or Bachelor of Science. The Division also offers certificate programs in Accounting, Advertising, Art, Business and Commerce, Chemistry, Industrial Management and Secretarial Science.

Anyone having the ability to pursue class work in a satisfactory manner may register in the Division of Adult Education. Those who are working for degree or certificate credit must be high school graduates, or meet the entrance requirements of the University by examination.

THE LABORATORY IS USED NIGHT AND DAY

HOME SERVICE AMERICA

THIS IS THE SOCIAL WORKER'S CREED—TO RESPECT THE DIGNITY OF THE INDIVIDUAL HUMAN PERSONALITY AS THE BASIS FOR ALL SOCIAL RELATIONSHIPS AND TO HAVE FAITH IN THE ULTIMATE CAPACITY OF THE COMMON MAN TO ADVANCE TOWARD HIGHER GOALS

## Raymond A. Kent School of Social Work

The Raymond A. Kent School of Social Work was originated by the Louisville Welfare League in 1918. In 1923 it was affiliated with the University of Louisville and in 1944 became a professional school offering a two-year course of graduate preparation for practice in social work. It is the only graduate school of social work in Kentucky.

The first year curriculum includes such basic areas as social case work, group work, community organization, medical information, psychiatric information, public assistance and public welfare. The second year student may take a concentration of courses in family and child social work, medical social work, or psychiatric social work.

The medical social work sequence is accredited by the American Association of Medical Social Workers. The psychiatric social work curriculum, which is supported by the grant under the terms of the National Mental Health Act, is accredited by the American Association of Psychiatric Social Workers. The two-year program in its entirety is accredited by the American Association of Schools of Social Work.

The field of social work is a fast growing one. The opportunities afforded professionally educated men and women are extensive. The most satisfactory preparation for careers in this profession now calls for a broad liberal education and a period of two years of graduate professional work. This School offers the degree of Master of Science in Social Work for the successful completion of the two-year course. A Provisional Professional Certificate is offered for the successful completion of one year of study.

To be admitted to the Kent School of Social Work a student must be a graduate of an accredited four-year college and have a broad background in Social Sciences.

STUDENTS AND SUPERVISOR DISCUSS A PROBLEM

# Air Force Reserve Officers' Training Corps

The Air Force Reserve Officers' Training Corps at the University of Louisville, established July 1, 1949, is one of over a hundred senior AFROTC units in the leading educational institutions of the United States.

The purpose of the AFROTC program is to prepare well educated young men for the performance of duties as junior officers in the Air Force. Graduates of the AFROTC are not required to serve on active duty except in time of national emergency, but may request active duty and be considered on the same basis as other officers.

A candidate for the AFROTC must be a male citizen of the United States, be physically qualified under standards prescribed by the Air Force, be accepted by the institution as a regularly enrolled student, be no more than 23 years of age for the Basic Course or 25 for the Advanced Course, and be accepted by the Professor of Air Science and Tactics.

Textbooks, other materials necessary for Air Science courses, and officer-type uniforms are furnished without charge to all students enrolled in the unit. In addition, those who are selected for the Advanced Course are paid the current rate of 90 cents per day including weekends and holidays.

The Advanced Course students are required to attend a six-weeks summer camp at a regular Air Force Base, held between the junior and senior years, during which they are paid at the rate of \$75.00 per month. Also they are furnished free transportation to and from the Air Force Base, living quarters, meals, clothing, equipment, and medical attention. At the camp the student makes practical application of the theoretical and technical courses studied on the campus. He also participates in air operational problems involving the use of military aircraft and equipment.

Upon completion of the entire AFROTC course and the requirements for a degree, the student is offered a com-

mission as Second Lieutenant in the United States Air Force Reserve. Outstanding students of each graduating class are tendered regular commissions subject to openings available. Thereby the student may choose the Air Force as a career.

The AFROTC has the privilege of enjoying many social functions both on and off the campus. His uniform identifies him as a member of a select and honored organization. He has increased opportunity to participate in intramural sports and is a welcome associate in Air Force activities in the community.

Further information concerning the enrollment and participation in the AFROTC, may be obtained by writing to the Professor of Air Science and Tactics, University of Louisville.

# Naval Reserve Officers' Training Corps

The University of Louisville is one of fifty-two honor colleges and universities selected by the Department of the Navy to maintain a unit of the Naval Reserve Officers' Training Corps. The NROTC Unit, University of Louisville, was established in July 1946.

The NROTC Program is composed of *Regular* and *Contract* students. Entrance into the NROTC program as a regular student is obtained as a result of a nation-wide competitive examination. The cost of tuition and fees will be provided by the Navy for regular NROTC students. In addition, the Navy furnishes textbooks as required, an initial uniform outfitting, and payment of retainer pay at the rate of \$600.00 per year.

While enrolled in the NROTC Program, students must take a course leading to a baccalaureate degree. In addition, NROTC students must complete 24 semester hours or 36 quarter hours of courses in Naval Science. Regular NROTC students are required to take two summer cruises afloat, as well as one summer period of aviation-amphibious indoctrination training. Upon graduation, Regular NROTC students are commissioned as Ensign, U. S. Navy or Second Lieutenant, U. S. Marine Corps and are ordered to active duty for a period of three years.

Entrance into the Contract NROTC Program is gained by application at the beginning of the Fall Term. Such entrance is contingent upon successful completion of a physical examination, registration in the University, and the results of a competitive examination and interviews. Contract students obligate themselves to take the same Naval Science courses required of Regular NROTC students, to attend one three weeks' summer training cruise, and to accept a Naval or Marine Corps Reserve commission upon graduation. Contract students receive an initial uniform outfitting, free Naval Science textbooks and draft deferment. In addition, Contract NROTC students receive an allowance of approximately \$27.00 per month during their Junior and Senior years. No active duty obligations are required of students commissioned from Contract NROTC sources, other than that required in time of National Emergency.

Candidates for both the Regular and Contract NROTC Programs must be citizens of the United States, be physically qualified, be unmarried and agree to remain unmarried while enrolled in the NROTC Program, obtain their parents' consent if a minor and agree to accept a commission if one is offered. A successful candidate may not be less than 17 years of age upon date of registration at the University nor more than 25 years of age on July 1 of the year in which he receives his first baccalaureate degree and commission.

Applications are accepted for the Contract NROTC Program only at the beginning of the fall semester of each year. Further information concerning the NROTC Programs, both Regular and Contract, may be obtained by contacting the Professor of Naval Science, University of Louisville.

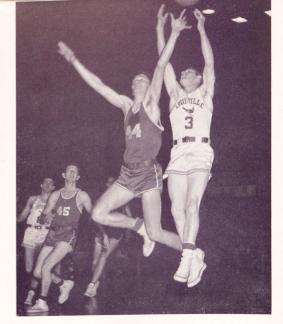

# Is going to College all work and no pleasure?

By pleasure you probably mean fraternities, sororities, dances, parties, athletics, concerts, the theatre and countless other ways by which younger people are entertained. If this is what you mean, you'll have pleasure at the University of Louisville.

# Information You Need to Know

#### Counseling and Guidance

The University is eager to be of the greatest service to the student and to assure his welfare. It has set up various types of advising and counseling services. The Registrar discusses matters concerning admission, advanced standing, status of residence, fees, and anything pertaining to the amount of credit or quality point standing and to transcripts being sent to other institutions. The Deans of the various Colleges are glad to discuss the courses a student takes, the general requirements of their respective Colleges, relation of college work to further education or vocations and requirements for graduation. The Dean of Women and the Dean of Men counsel in regard to housing and social activities. The University Physician and Nurse advise in regard to health problems. The University Counseling Service provides help on personal problems.

The Psychological Services Center has been established by the University primarily to offer a personal counseling service to students in the various schools. Counselors in the Center are staff members of the Department of Psychology who are qualified to offer guidance in the areas of educational, vocational and personal problems. This service is available without charge to University students. A major function of higher education is to provide students with opportunities for personal growth and development. Frequently, certain factors in the life of a student hinder him from taking the fullest advantage of the opportunities provided by the University. The services of the Psychological Center are aimed at assisting him to grow in the direction of a richer and more satisfying life experience. The services offered by the Psychological Center include counseling interviews and psychological testing.

#### Student Health Service

The Department of Student Health Service is under the direction of a qualified University Physician.

Students are required to take complete health examinations, including blood test, chest x-ray, and urinalysis as directed by the University Physician. The examinations are designed to discover defects at as early a stage as possible. Since the stress is laid on hygiene and preventive medicine, no definite treatment is given by the University Physician, but when advisable he refers students to their family physicians or to suitable specialists. A woman attendant is present to assist in the examination of women students.

Results of the examinations are strictly confidential, but are used by the University Physician to determine students' fitness for physical education classes, for athletics, and for ability to keep up with their academic work.

Evidence of satisfactory vaccination for smallpox is required by the City-County Board of Health and scars or certificates of vaccination are passed upon by the University Physician. In addition, students are urged to be immunized against diphtheria, typhoid and tetanus.

In addition to the provision of health examinations, the University Physician is available by appointment for consultations with students on matters of personal health and hygiene.

#### Expenses and Fees

In most institutions, the cost of a college education falls into two general divisions. The first includes fixed charges for tuition, fees and deposits for instructional services. The second includes living costs and all items of personal expense that must be met by students during the year. In practically all instances, expenses of the second category greatly exceed the costs that are related to instruction.

Students residing in Louisville and Jefferson County are unusually fortunate in being able to minimize living and personal expenses. It is an exceptional case when students living at home find that their personal expenses are as large as those incurred by students attending universities away from home. In choosing a college, therefore, it is advisable for students to take into consideration *all* costs involved, including those which are related to personal living expenses which, naturally, increase at a considerable rate for students who are attending out-of-town schools.

In the assessment of fees at the University of Louisville a student is defined as being either a resident student or a nonresident student. If a student has a bona fide residence in Jefferson County he qualifies as a resident student; those living outside the limits of the County are assessed at non-resident rates. In the School of Medicine, resident status is determined by residence or non-residence in the State of Kentucky. The schedule of semester fees for the various schools of the University is as follows:

	Resident	Non-Resident
College of Arts and Sciences	\$224.00	\$274.00
Speed Scientific School	148.00 (per quarter)	183.00 (per quarter)
School of Music	259.00	274.00
School of Medicine	400.00	600.00
School of Law	224.00	274.00
	168.00 (evening school)	200.00 (evening school)
Graduate School	14.00 per credit	14.00 per credit
School of Dentistry	314.00	364.00
Division of Adult Education	14.00 per credit	14.00 per credit
Kent School of Social Work	162.00	212.00

#### Financial Aid

All schools of the University of Louisville offer to deserving and worthy students financial assistance in the form of scholarships, loans and part-time employment. With a continuous increase in scholarships and other opportunities for financial assistance, young men and women who are really ambitious for a college education should not find that the financial barrier is too great to overcome.

Students who desire full-time or part-time work are assisted by the Office of Field Relations and Placement. The director of this office is in charge of vocational counseling and will give the student valuable aid in planning and obtaining employment.

For further information about any School of the University of Louisville, please write to the Office of the Registrar, University of Louisville, Louisville 8, Kentucky.

# The President Speaks

Going to college for the first time is not an everyday event. It is an experience which you will remember in all your later years for the thrill that comes from stepping into a new life. It is a time when you stand on the threshold of intellectual adventure, a little awed, a little frightened, but exhilarated by your high hopes and an eagerness to be worthy.

You will have busy days, with new friendships, with exciting living in a world of football, fraternities, parties and plays, planned for your development in social responsibility and usefulness in your relationship with others.

You will soon learn, however, that above all, a college is an educational institution. Its reputation is revealed by the character of its administration, the quality of its instruction, the integrity of its research, and its ability to produce young men and women with trained, independent and enquiring minds.

The University of Louisville has accepted these responsibilities, and the esteem it has gained identifies it as a great university. Scores of men and women, intellectually capable, morally responsible and vocationally successful, have shared this development. It is my earnest hope that you will be one of many who will find here the inspiration and direction for happy and intelligent living in the future.

Sincerely yours,

Philip Davidson, President

Sulip Diriter
